Section

HPSP-16 presenter – High Pressure Semiconductor Physics

Dear HPSP-16 presenters,

Related to this year's International Conference on High Pressure in Semiconductor Physics (HPSP-16, Aug 6-8 2014, Mexico City) we plan to publish a regular topical section (**no conference proceedings**) with selected contributions on the diverse aspects of high-pressure semiconductor research in *pss (b) – basic solid state physics*. In collaboration between the Guest Editors and the pss Editorial Office we cordially invite you to contribute a **Feature Article** (topical review) or **Original Paper** manuscript based on or related to your conference presentation.

The physica status solidi journals are designed to reach a broad audience in the field of condensed matter and materials physics. pss is a large and well-established publication platform in solid state physics with more than 1500 articles per year – now over 50 years in business – and is widely accessible as part of many institutional site licenses, evidenced by close to one million article downloads annually.

All submitted manuscripts will undergo **peer review**. According to the editorial policy of pss, two positive recommendations by independent referees are a prerequisite of acceptance. Peer review and publication occur rapidly on individual manuscript basis. Published in Wiley Online Library **Early View** shortly after acceptance, your article is citable immediately; hence there is **no waiting for the remainder of the contributions**. When all articles are complete, the topical section will be included in a regular monthly issue of pss (b). The clustering of related articles raises the visibility of these articles significantly, and we are confident that this will become a quality publication reflected by high article access and citation numbers.

Please refer to the author instructions available on our homepage www.pss-journals.com → **Author Guidelines** (including optional Word template and LaTeX style files and the link to **online submission** to [**pss \(b\)**](http://pss(b)) through Editorial Manager). Please **mention** that this is a submission to the **HPSP-16** topical section in your cover letter and **select the appropriate section HPSP-16 presenter – High Pressure Semiconductor Physics** to expedite handling. Of course, you are welcome to discuss the type of your article and any questions you may have prior to submission with the editors.

We look forward to receiving your contributions!

Isaac Hernández-Calderón, Andrés Cantarero, Stefan Hildebrandt, Sabine Bahrs

WILEY-VCH

Information on submissions:

Feature Articles should provide an overview of a current topic in the format of a topical review of about 10–12 (max. 15) journal pages. Due to this length restriction, a complete bibliographic overview on the existing literature cannot be expected, but referencing should be well-balanced. The manuscript should represent a snapshot of most recent progress, the state of research and particularly relevant aspects, with focus on the highlights and possibly open or controversially discussed questions. They are intended to inform an audience not immediately familiar with the specific topic. Original, previously unpublished results may also be included to a certain extent.

Original Papers expose original and previously unpublished work of general interest to the community. Manuscripts do not have a strict length limit (typical lengths vary from 6 to 10 journal pages). Articles must fulfil the standards and requirements of the journal. Acceptance of a contribution for presentation at the conference does not automatically include publication in the topical section. The main criteria for consideration by pss are:

- The importance, relevance, and novelty of the results match those expected for a regular journal paper.
- The general quality of the manuscript and the amount of information provided is appropriate for an international journal. Serial or incremental, pure self-referential and lab-report-style work is discouraged.
- Main results have not yet been published (also not in conference proceedings) and are not under consideration for publication elsewhere.

Online submission www.pss-journals.com → click on pss (a) or (b) cover → Submit an Article

Further **benefits** for pss authors include:

- No page charges or publication costs for authors. Free online colour.
- Supporting information, e.g. additional data, figures, videos or animations can be published online.
- Open Access option in Wiley OnlineOpen (wileyonlinelibrary.com/onlineopen).
- Author suggestions for journal cover figures or frontispiece pages, especially for Feature Articles
- The PDF file of the article will be provided as electronic reprint free of charge. Colour print (at reduced rates for Feature Articles), journal issues, reprints with cover page, posters etc. are available for purchase.
- pss is indexed in ISI Web of Science and all other major abstracting databases.
- Promotion of selected content via web portals, e.g. materialsviews.com, newsletters, and press releases.
